

Hritik Jung Basnet

Cyber Security Professional | Network Security & SecOps

hritik.jung@gmail.com • 07386 811735 • London SE2 0EY • linkedin.com/in/hritik-jung-basnet

Summary

Cyber security professional with hands-on experience deploying enterprise security infrastructure — Palo Alto NGFW, Cisco FTD/FMC, Cisco ISE, F5 WAF, and Arbor APS — for a national government data centre. Network engineer turned security practitioner, with practical exposure to incident response, firewall and IDS tuning, vulnerability management, and ISO 27001 controls. Currently completing MSc Cyber Security with Advanced Practice (Northumbria University) and available immediately on placement-year work rights. Open to SOC, network security engineering, or analyst roles.

Skills

Hard Skills: Palo Alto NGFW, Cisco FTD/FMC, Cisco ISE, F5 WAF, Arbor APS, IDS/IPS, VPN, MFA, SSO, SIEM concepts, vulnerability scanning, incident response, runbook authoring, ISO 27001, NIST CSF, CIS Controls, OWASP, Metasploit, Nmap, Burp Suite, Kali Linux, Cisco and Juniper switching, TCP/IP, Windows Server, Linux, AWS, Azure, Python, Bash, SQL, ASP.NET MVC.

Soft Skills: Clear technical communication, methodical problem-solving, calm incident-triage approach, collaborative across InfoSec and operations teams, continuous learner (active on TryHackMe, Hack The Box, CTFs).

Experience

IT Officer — The IELTS Institute, Nepal | Sep 2023 – Nov 2024

- Owned IT and security operations for an online learning platform serving staff and students across the institute, including endpoint hardening, patching, and incident logging.
- Implemented role-based access controls and MFA across staff accounts, eliminating shared-credential use within the first quarter.
- Delivered quarterly cyber-awareness training to all teaching and admin staff across the institute, improving phishing-simulation report rates over the 14-month tenure.
- Maintained Linux and Windows Server environments with monthly patching cycles and weekly backup verification.

Network Engineer — Nextgen Solutions, Nepal | Jul 2022 – Jul 2023

- Deployed Palo Alto Next-Generation Firewalls, Cisco FTD/FMC, and Cisco ISE for Nepal's Government Integrated Data Centre, a multi-tenant national infrastructure environment with zero-trust segmentation.
- Implemented F5 Web Application Firewall and Arbor APS DDoS protection across government and enterprise sites, including signature tuning and incident-response handover documentation.
- Configured firewall rule-sets and VPN concentrators aligned to ISO 27001 control objectives, contributing to the data centre's hardening posture.
- Administered Juniper switching estate, Dell EMC servers, and Cisco ESA/SESA/SWSA email and web security gateways across enterprise clients.
- Partnered with InfoSec and operations stakeholders on alert triage, vulnerability remediation, and configuration governance.

.NET Developer — Qxera, Kathmandu | Sep 2019 – Mar 2020

- Developed ASP.NET MVC web applications and tuned SQL queries within cross-functional teams, contributing application-layer perspective relevant to security review work.

Projects

- Delivered cyber security and networking workshops as Volunteer IT & Cybersecurity Trainer across community and academic audiences in Nepal (Aug 2022 – Oct 2024).
- Active learner on TryHackMe and Hack The Box; participate in CTF competitions to maintain hands-on offensive-security practice.

Education

MSc Cyber Security with Advanced Practice — Northumbria University, London | Jan 2025 – Present

MSc Computer Science (Dean's List) — Pokhara University, Nepal | Sep 2019 – Aug 2022

BE Information Technology — Pokhara University, Nepal | Sep 2014 – Sep 2018

Certifications & Training

CCNA Routing & Switching training; AWS Academy Cloud Foundations; Cisco ESA, ISE, NGFW, SESA, SWSA Bootcamps; Zimbra Pre-Sales Engineer.
