Hritik Jung Basnet

Cyber Security Engineer
London, UK — +44 7386 811735 — hritik.jung@gmail.com — linkedin.com/in/hritik-jung-basnet — github.com/ph0enix14464

Professional Summary

Cybersecurity professional combining hands-on infrastructure security experience with applied research rigour, having secured network infrastructure for a government data centre and independently built and validated a machine learning-based security system. Comfortable across the full security lifecycle: network defence, threat detection, incident response, and compliance. Completing an MSc in Cyber Security with Advanced Practice (on track for Distinction), with a track record of delivering measurable, well-tested results across both operational and research settings.

Technical Skills

Network Security: Palo Alto NGFW, Cisco FTD/FMC, Cisco ISE, F5 WAF, Arbor APS DDoS protection, Zero Trust architecture (NIST 800-207), IDS/IPS, VPNs
SIEM & Monitoring: ELK Stack (Elasticsearch, Logstash, Kibana), Splunk, log analysis, incident investigation
Programming & ML: Python, scikit-learn, applied deep learning (LSTM/GRU), C#, ASP.NET MVC, SQL Server, Bash, Git, Docker
Systems & Identity: Windows Server, Linux, Active Directory, role-based access control (RBAC), multi-factor authentication (MFA), vulnerability management, ISO 27001
Offensive Security: Metasploit, Nmap, Burp Suite, Kali Linux
Cloud: AWS (Academy Cloud Foundations)

Professional Experience

IT Officer — The IELTS Institute, Nepal *Aug 2023 – Nov 2024*
- Administered servers; rolled out RBAC and MFA, eliminating shared-credential use within the first quarter
- Ran marketing and content initiatives to grow student reach alongside core IT duties
- Resolved operational security incidents with structured documentation; delivered staff training

Network Engineer — Nextgen Solutions, Nepal *Jul 2022 – Jul 2023*
- Deployed and managed Palo Alto NGFW, Cisco FTD/FMC, and Cisco ISE for a national Government Integrated Data Centre, implementing Zero Trust network segmentation
- Configured F5 WAF and Arbor APS DDoS protection; aligned firewall rule-sets and VPN concentrators to ISO 27001 control objectives
- Used ELK Stack and Splunk for log aggregation, threat visibility, and incident investigation

Freelance Content Writer — Datalytics, Nepal (Part time) *May 2020 – Feb 2021*
- Collaborated independently with clients to understand content requirements and deliver engaging, informative articles across varied platforms
- Produced high-quality written content consistently meeting client specifications and deadlines, building strong technical writing and communication skills

.NET Developer — Qxera, Nepal *Sep 2019 – Mar 2020*
- Developed responsive user interfaces using HTML, CSS, JavaScript, and jQuery; integrated front-end components within the MVC architecture
- Optimised SQL Server stored procedures for efficient data retrieval and manipulation

Projects

SSRF Adaptive Defense Framework — MSc Dissertation, Northumbria University *2026*
- Built a Python/scikit-learn ML classifier for SSRF attack detection, enforced independently via 7 Kubernetes NetworkPolicies implementing Zero Trust (NIST 800-207)
- Achieved 89% detection accuracy with 0% false positives across a 900-case automated test protocol against OWASP WebGoat

Travel Route Planning via Congestion Detection & Arrival Time Prediction — MSc Thesis, Pokhara University *2022*
- Built a GPS trajectory congestion detection system using LSTM/GRU models with HMM-based map matching on Kathmandu valley data
- Simulated using OMNeT++, Veins, and SUMO; tooling included Python and QGIS

Letscode Together — BE IT Final Year Project, Pokhara University *2018*
- Built a real-time collaborative coding platform with a shared live editor, using web technologies and SQL

Enterprise Network Design — BE IT Project, Pokhara University *2016*
- Designed a dual-ISP redundant LAN with HSRP, OSPF, VLAN/STP segmentation, and SSH-secured administrative access

Education

MSc Cyber Security with Advanced Practice — Northumbria University, London *Jan 2025 – Mar 2027 (expected)*
On track for Distinction

Master of Computer Engineering — Pokhara University, Nepal *Sep 2019 – Sep 2022*
Dean's List, CGPA 3.94/4.0

BE Information Technology — Pokhara University, Nepal *Sep 2014 – Sep 2018*
CGPA 2.75/4.0

Certifications and Trainings

- AWS Academy Cloud Foundations
- Zimbra Pre-Sales Engineer
- Cisco ESA, ISE, NGFW, SESA, SWSA Bootcamps
- CCNA Routing & Switching Training

Additional Information

Active on TryHackMe and Hack The Box (SOC paths, web exploitation, privilege escalation). Volunteer cyber security trainer, Nepal (2022–2024). Languages: English (fluent), Nepali (native).
